Skills

Frontend Architecture: Next.js, React, Micro-frontends, Monorepos (Bazel), State Management (Redux Toolkit), React Native, Expo, Node.js, Express.js, Angular, Jest, React Testing Library, Webpack
Core Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Tailwind
Database: MySQL, MongoDB, PostgreSQL
Others: Github, Git, OOPS, CI/CD pipelines, Azure, Accessibility (WCAG 2.1), Performance Optimization, API Integration

Work Experience

H&M, Bengaluru

Sep 2024 - Present

Software Engineer

- Led migration of Newsletter Sign up to **Next.js microfrontend architecture**, improving scalability, maintainability, and enabling independent deployments.
- Delivered a **global unsubscription system across 50+ countries**, addressing localization, compliance, and cross-region consistency at scale.
- Collaborated with backend teams to define **data ownership and API contracts**, ensuring scalable and resilient architecture.
- Improved frontend performance by **~35% and reduced page load time by ~20%** via code-splitting, SSR optimization and asset-caching strategies..
- Built **accessible, WCAG-compliant UI components**, improving usability and aligning with global accessibility standards.
- Next.js, React, TypeScript, React Testing Library, Cypress, Git, Bazel.

Publicis Sapient, Bengaluru

Nov 2021 - Sep 2024

Experience Engineer L2

- Led migration from Backbase Server to Next.js, improving system availability and reducing operational costs by **up to 40% through monorepo adoption**.
- Developed a scalable, reusable component library aligned with a **design system** to reduce development time and effort up to 50% ensuring consistent UI/UX across multiple applications using monorepo and bazel.
- Minimized technical debt and improved **code quality by 30%** with automated **Codemod transformations**.
- Enhanced accessibility compliance and cross-browser compatibility by 80% through rigorous **Cypress testing**.

LTIMindtree, Bengaluru

July 2019 - Nov 2021

Software Engineer

- Created an onboarding platform SMARTPANE from scratch which **reduced onboarding time by 40%** by automating repetitive tasks.
- Implemented role-based access control to ensure that employees can easily access relevant documents while maintaining data security and privacy.
- Angular, Angular Material, TypeScript, AWS, Node.js, Express.js

Project Work

- **BunaiApp (2026):** Launch an end-to-end SaaS platform by modernizing legacy textile design software, enabling scalable, location-independent design workflows for the power loom industry using [Next.js](#), Supabase, Go and **AI Agents**.
- **Vivance App (2023-Present):** Developed a cross-platform flight booking app (Android/iOS) using React Native, TypeScript, GraphQL, and Spring Boot; led and mentored a team of 3, driving best practices and code quality

Education

Techno Main Salt lake, Kolkata

Aug 2015 - Jun 2019

Bachelor of Technology in Information Technology

CGPA: 7.8/10
